I advise to extract the zip file to the folder of your choice. It will extract all section files to a folder named "SSR_2004_Service".

To use the manual, open "MENU.pdf". [MENU.pdf is also the file you would create a shortcut to for your desktop]. From there, I suggest clicking on the "Table Of Contents" or the "Index", which are both fully hyper linked to the manual sections. As well, all files are fully searchable with Ctrl+F. Each Section's Table of Contents page are fully hyperlinked as well.

There are some additional files included which are not service manual related. We might add to these from time to time as appropriate.

To go back, simply hit Ctrl + Left Arrow until you are back at the Table of Contents. There are navigation tools available that you can add to your Acrobat Reader toolbar. Just right click on the toolbar and enable (check) all navigation aids.

If you wish to keep your TOC open while you explore other sections, (that is, have new sections open in a new window), navigate the Acrobat Reader menu to Edit, Preferences, Documents, uncheck "Open cross-document" links in same window.
