

Introducing the GMC TransMode.

Imagine a very special kind of vehicle. A vehicle that offers the great chassis and exterior design features of a GMC MotorHome.

But with one important difference: No interior.

That's what the TransMode is all about. It offers three walls, a ceiling and a floor that you can paint, panel, carpet, upholster, and otherwise custom-build to fit just about any use you or your company have in

mind.* There's a choice of body lengths: 23' or 26'. And it can be ordered with or without windows.

Several designer's conceptions are shown inside to demonstrate the range of TransMode's versatility. But from here on, it's up to you and the breadth of your imagination. The only practical considerations are overall weight, plus proper weight distribution and good construction techniques.

Here's the plan:

Call your nearest GMC MotorHome dealer. Not only will he be glad to sell or lease you a shiny new TransMode, but he offers you the added benefit of dependable one-stop service after you buy. He can help bring you together with any of a number of competent specialized upfitters who can work out with you the exact interior design and equipment you want.

*It is the responsibility of the retail customer to assume the compliance of the upfitted vehicle with all applicable federal, state, local and other regulations.

Introducing the Mobile Anything.

The Mobile Display

Here the TransMode has been converted into a traveling furniture showroom, ready to let customers come in direct contact with the product. Features include a full length wall display, cabinets for literature and sales manuals, a cocktail /coffee bar as well as a sink and wardrobe module. And its aerodynamic exterior (which you can custom-paint) is an assured attention getter.

The Medi-Unit.

With its responsive 455 cubic-inch engine and front-wheel-drive, the TransMode is a natural as an emergency or special treatment vehicle. As a matter of fact, the TransMode has already proven itself for such usage in a number of communities. The TransMode's tandem rear wheel setup allows plenty of usable floor space, and its adjustable air suspension enables it to be parked level on uneven terrain.

The Company on Wheels.

This concept incorporates a lounge-discussion area with a 48" wide couch. Beyond that is a "Steno Pool" complete with desk, writing table, filing cabinets and storage area. There's even a bulletin board and a closet. Not to mention a lavatory and wet bar. Or, if you like, the TransMode's interior could be made into a sensational conference room, or a product display area, even a repair shop or a laboratory.
